

Photo Studio Policy and Guide

This guide includes instructions for using the Photo Studio.

Equipment Available

Arri 150 and Arri 300 Photography Lamps with adjustable stands and barndoor shutters.

53" wide black or white paper backdrops on adjustable stands.

Black cloth backdrops.

Slik and Manfrotto camera tripods.

Umbrella and flexible light reflectors/diffusers if you need to bounce flash or natural light.

Student Use

Students are only allowed to use the Photo Studio by reservation or appointment. Make sure to check in with Media Lab staff before entering the Photo Studio.

Only 2 students are allowed in the Photo Studio at a time.

Light bulb filaments in the lamps are very delicate, especially at high temperatures. If you need to reposition the lamps once they are hot, do not move them with the power on. Turn the power off, allow them to cool down for several minutes, then very gently and cautiously reposition them.

Check with Media Lab staff before changing backdrops.

Make sure the power cables are routed in such a way they are not a trip hazard as you are photographing.
