

VPAT Summary Report Padlet

This report is a summary of the Voluntary Product Accessibility Template (VPAT) for a specific product. It is intended to offer a quick view of the technical information in the VPAT and offer guidance for the product’s use in compliance with WCAG 2.1 level AA, for those less familiar with WCAG.

About

Reviewed by unit: Digital Learning Innovations (DLI)

Report Date (from VPAT): 1/1/2025

Date Reviewed: 3/30/2026

Highest Standard Used: WCAG 2.2

Access Type: Published on vendor website

Application Name: Padlet

Description and Primary Purpose or Most Common Use Case of Application:

Padlet is a digital collaboration platform that enables individuals or groups to post comments, questions, and resources on a visual board. Users can organize and share content such as text, images, videos, links, maps, and more on an online ‘post-it’ wall. The content can be set to public or private, making it ideal for various types of communication, particularly in classroom settings. Several third-party tools are integrated into Padlet with only one other, Calendly, offering a VPAT. Only the Padlet Board product is covered. Padlet Sandbox and mobile apps are not covered.

Compliance Scope:

Application is accessed by end user directly (e.g. D2L, Banner, etc.): **Yes**

Application produces content accessed by end user through other platforms (e.g. Adobe InDesign, etc.) **No**

Overview and Recommendation

According to the VPAT, this is how many criteria are supported, partially supported, or not supported in the A and AA tables.

Supports: **45**

Partially Supports: 5

Does Not Support: 3

Not Applicable: 3

Initial Concerns and Recommendation:

Beyond having multiple partially supports and does not support items listed, probably the most concerning accessibility unknowns are the integrated tools in Padlet that don't have VPATs. Also considering that the mobile app is excluded, there is no way to tell whether students who access via mobile app will be at a disadvantage.

Recommendation (See [term definitions](#)): **Recommend find alternative**

Workarounds and Compliant Use Options

In order to maintain WCAG compliance, we recommend the following:

See notes under initial concerns and recommendation.

Recommendation term definitions

- **Recommend find alternative:** The VPAT reveals accessibility gaps that are so numerous or severe that the application would be difficult or impossible to be used in a compliant manner.
- **Use cautiously with workarounds:** Minor accessibility gaps may be present but are limited to certain features. Avoiding using those features or modifying use of the application may help maintain compliance.
- **Use workarounds and accessibility features:** Minor accessibility gaps may be present but are limited to certain features. Avoiding using those features or modifying use of the application may help maintain compliance. Tool must be configured properly for compliance or contains accessibility features that must be used correctly to ensure compliant product.
- **Use accessibility features:** Tool must be configured properly for compliance or contains accessibility features that must be used correctly to ensure compliant product.
- **No concerns. Application is ready:** The tool has no accessibility concerns and should produce accessible content with minimal effort.
