

# ROOMMATE SELECTION

## CLICK GUIDE

### First-Year Roommate Pair

Please note this step is an optional step in the selection process. You can create a roommate pair with either incoming students you already know or recommended matches based on your profile preferences.

"Search by Details" allows you to search for roommates based on name.

"See Recommended Roommate Matches" allows you to see students that have similar preferences as you, like ideal noise levels and temperature preferences.

### You are allowed to have a roommate pair with a maximum size of two people.

Please note: Room Selection timeslots open at various times for students based on when they completed their Housing Application and signed the License Agreement. We suggest that you select the person in your roommate pair who signed their License Agreement the earliest to be your roommate pair leader for the best selection of units available. The roommate pair leader will be able to place themselves, and members of the roommate pair into individual beds/rooms within the unit selected when their timeslot opens. Students who are not designated as the pair leader can place themselves into a room, but do not have the ability to place other members of your roommate pair.

### Not In a Pair

You are not a member of a roommate pair.

CREATE PAIR

SAVE & CONTINUE

**CREATE PAIR:** This option allows you to create a unique group for yourself and a preferred roommate. **This is recommended for students with an early time ticket who already know who they want to live with.** It is then the responsibility of the student to send the group name and password to their preferred roommate so that when that person's time ticket for Roommate Selection opens, they can click "Join Pair" and enter the information.

**SAVE & CONTINUE:** This will take you beyond the roommate process. **Please do not click continue unless you want to skip roommate selection (it is optional) OR you have verified that you have successfully matched with your preferred roommate.** If you accidentally move beyond the process, you can return by clicking on the page titled "First-Year Roommate Pair" while Step Two is open.

Join Pair

Search for Roommates by Name

See Recommended Roommate Matches

**Join Pair:** This option allows a student who is trying to **JOIN** a roommate pair that's already been created by their preferred roommate by entering the name and password.

**Search for Roommates by Name:** This option allows for students to search for a specific person. Note: if you create a pair then you become unsearchable. Students who are looking for a specific person should either create a pair and share the name/password with that person directly OR search for a person and send them the request.

**See Recommended Roommate Matches:** This option allows for students to see recommended roommate matches based on their answers under the *My Profile* section. **This is recommended for students who do not already know who they want to live with. Students in this scenario should NOT create a pair in advance. This action makes them unsearchable.** After browsing and finding a match, then a student can either send the request directly to their preferred roommate OR create a pair and share the name/password.
